# Intelligently power your fleet with InControl™ CMS

InControl connects every aspect of your EV charging ecosystem – energy sources, chargers and vehicles – for complete visibility into charging operations, all in one place.

## Reduce expenses

Realize cost savings & mitigate demand charges with smart load management

## Maximize fleet productivity

Easily submit service requests & proactively track open cases

## Analyze key metrics

Simplified reporting measures ROI or sustainability impact

## Seamlessly integrate vehicle telematics

Open API platform easily joins existing systems, including Geotab

## User-friendly fleet charge management

Depot view enables real-time session insights, charger status, and vehicle State of Charge updates - optimized for tablet

## Access control

Manage charger use with PIN or RFID
